INTRODUCTION AND DEFINITIONS

Freeport High School uses the following nationally recognized terms to help guide students through the selection of coursework and to support their decision-making in preparation for their postsecondary goals.

Career Cluster: Group of occupations and industries that have a set of foundational knowledge and skills in common. There are 16 nationally recognized career clusters which each contain multiple career pathways.

Career Pathway: Multiyear program of academic and technical study that prepares students for a full range of postsecondary options within each career cluster. Career pathways provide a context for exploring career options at all levels of education. Career pathways link student learning to the knowledge and skills needed for future education and employment.

Program of Study: Sequence of courses and experiences which include core academic, career and technical education content. Programs of study include opportunities to earn college credit and industry-recognized credentials or certificates and gain external career experiences while in high school. Programs of study also may lead to a student earning a college degree.

Within each Freeport High School Program of Study the following terms are used to describe coursework and opportunities which align with that career area.

Pathway Courses: recommended sequence of courses which provide students opportunities to explore and develop skills within a specified career area.

Related Electives: courses which provide students additional opportunities within the specified career area or opportunities to develop skills and knowledge in a closely related career area.

Dual Enrollment Credit: allows Freeport High School students an opportunity to enroll in postsecondary courses and receive both high school and postsecondary credit.

Career-Related Activities: opportunities for student career exploration and/or career skill development which may include the involvement of industry partners. These opportunities are generally less formal and/or intensive than external experiences in the areas of career exploration and/or career skill development.

Certifications: credentials awarded to students by an independent third party verifying qualifications or competencies in a career skill area. Industry-recognized certifications are sought or accepted by employers as recognized, preferred or required credentials for recruitment, screening, hiring, retention or advancement purposes of their employees.

College Majors: College majors are concentrations of educational study focused on a career area. College majors can lead to an associate's, bachelor's, master's or doctoral degree. In this document, a sample of majors related to each program of study is listed.

Careers: Careers are occupations which usually require special training or formal education. In this document, a sample of careers related to each program of study is listed.

FREEPORT HIGH SCHOOL

TOMORROW'S LEADERS LEARNING TODAY

MISSION The primary purpose of our school system is to teach all children how to learn and to foster in each child the desire for lifelong learning. We are committed to providing the means for intellectual, emotional, ethical, social and physical growth for cultural and ethnic diversity, which will assist every individual in becoming an informed and productive participant in our democratic society.

VALUES

1. HONESTY/INTEGRITY:

- To be truthful, to distinguish between right and wrong, and to choose to do what is right.

2. RESPECT:

- To show regard for self, others, the environment, property and government laws.

3. COURTESY:

- To display appropriate behavior that shows consideration for others.

4. SELF-DISCIPLINE:

- To display effective and appropriate control of oneself and one's conduct and persevere in the pursuit of self-improvement.

5. COMPASSION:

- To be sympathetic and understanding of the needs and feelings of others – the ability and desire to care.

6. TOLERANCE:

- To have a fair and objective attitude toward those whose ideas, race or creed is different from our own.

7. LOVE OF LEARNING:

- To have intellectual curiosity.

8. RESPECT FOR EDUCATION:

- To have regard for the worth of the learning environment and the resources needed to develop each human being to his/her potential.

9. RESPONSIBILITY:

- To demonstrate personal accountability and work to the best of one's ability; to respond to the needs of others.

10. SERVICE:

- To provide service to the community.

A MESSAGE FROM YOUR SUPERINTENDENT

Dear Freeport High School Student:

On behalf of the faculty, staff and administration of Freeport High School, congratulations on starting your Pathway toward career success. Throughout your time as a Freeport student, you will be engaged in and participate in many experiences and opportunities which will simultaneously prepare you to graduate high school, be successful in college or postsecondary training and to attain employment in a career field which matches your strengths, abilities and aspirations.

Looking at high school as a time in your life when you take classes with an end goal of a diploma is a thing of the past; instead, Freeport High School is the beginning of your Pathway to all you dream of and hope to achieve. Through career exploration and research, you will identify your interests. Matching these interests with your schedule of required and elective courses, you will take classes which have meaning and value to you as a learner. Within these classes, you will explore careers which allow you to take your interests and strengths into the workforce and the many employment opportunities within that field. You will learn of the training and education which will allow you access to each level of that career field, from entry level with a diploma to top-level positions requiring advanced training and higher education.

Within your selected Pathway of study, you will be part of experiences that deepen your understanding of related career fields. Engaging with prospective employers and successful employees, visiting sites which align with career fields, and participating in distance-learning activities to further enhance your understanding of potential career fields, will all be part of your Pathway experience.

Connecting with institutes of higher education which can continue your education within your selected Pathway will be common throughout your time at Freeport High School. Whether it is through enrollment in one of over 20 dual enrollment courses, Advanced Placement courses, college-credit grant programs, or through campus tours and fairs, college will not be a foreign and frightening place come graduation. Our hope is that you will accumulate up to 24 college credits, almost a full year, even before you earn your diploma from Freeport High School.

Taking advantage of the countless professionals invested in your success and your future throughout your time at Freeport High School is a choice you alone must make. We are all there to support you, but you must take the first step. Imagine yourself on stage at graduation, knowing the exact steps you need to follow after high school to reach the goals in life you have imagined for the past four, five, possibly even 10 or more years. This is no longer a thing of dreams; at Freeport High School, this is now your reality. Carefully and consciously navigating your Pathway is how you achieve it. We will all meet you at the door to assist you along on the journey.

Welcome to Freeport High School, the Pathway to your success.

Dr. Kishore Kuncham

Superintendent of Schools

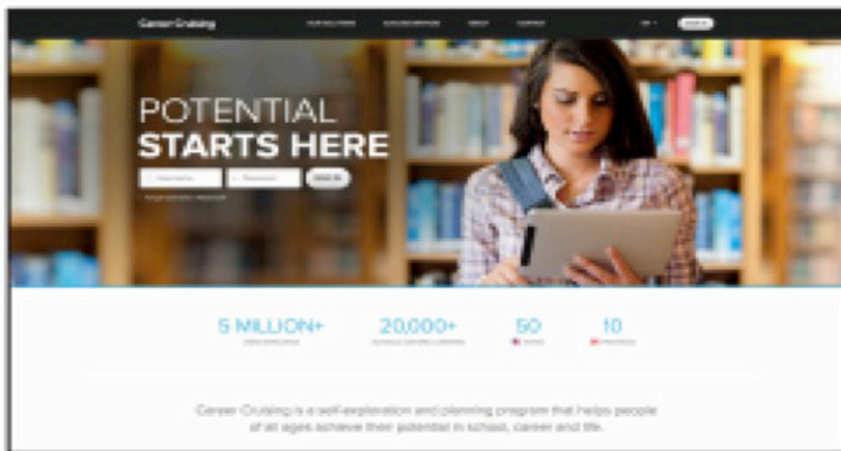

THE PURPOSE OF A PATHWAYS MODEL

Your guidance counselor will be your Pathways guide throughout your time at Freeport High School. In addition to the required courses you will take, you will have the opportunity to select elective courses which align to your identified interests, strengths and potential career path.

In your ninth-grade year, you will partake in a career exploration experience which will allow you to discover which career fields and jobs your interests and strengths would fit well within. You will have the opportunity to research jobs and career fields of your choosing, as well as engage in many lessons in each of your courses focused on career exploration. You will also attend freshman seminars designed to increase your awareness of postsecondary and employment options and requirements, hear from community members as they discuss how they arrived at their respective career levels and dialogue with local employers to hear what they look for in their future workforce. When it comes time for you to schedule your classes for your 10th-grade year, you will be prepared to identify a pathway of interest which will influence your future decisions at Freeport High School.

As a 10th-, 11th-, and 12th-grader, you will have a direction and purpose to selecting the courses you enroll in, the extracurricular activities and clubs you participate in, and have many opportunities to prepare yourself for the college coursework and career field you plan to pursue after graduation.

Helpful Internet Tools for Finding a Career Pathway

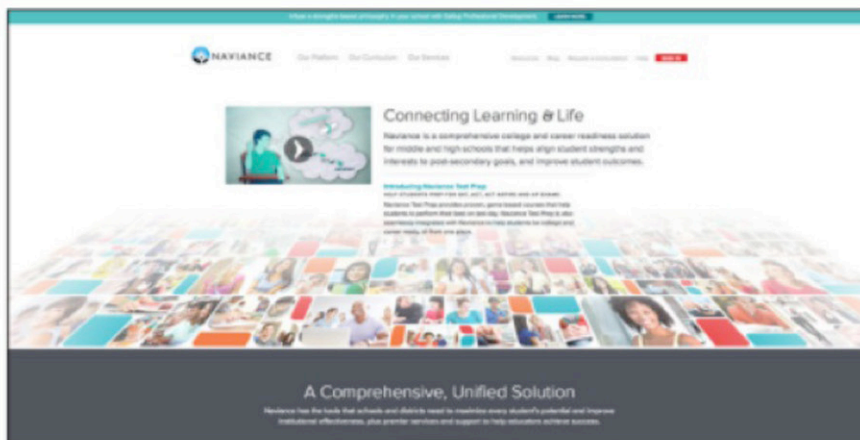

www.careercruising.com

Career Cruising is an internet-based career exploration and planning tool used by students to explore career and college options and develop a career plan. Features of the program include: Assessments, Career Profiles, Multimedia Interviews and College/University and Apprenticeship Information.

HOW TO USE THE FREEPORT HIGH SCHOOL PATHWAYS SUPPLEMENTAL CATALOG

The Pathways Supplemental Catalog should be used alongside the Freeport High School Program Offerings catalog when planning your schedule each year. As you have the opportunity to plan your schedule, consider the career fields your Holland Code assessment indicated fit your strengths and interests, and discuss the elective options with your guidance counselor. Also in the catalog are extracurricular activities which align to those pathways to further enhance your experiences within that pathway. Together with the course catalog, you will be able to design a sequence of study that meets your needs and goals as a Freeport High School student, future collegian and future member of the work force.

You will also find “career guides” which showcase some of the in-demand career professions within each pathway. These guides identify the education and training required for various levels within that profession, and the starting salaries one can expect based on those levels. They also highlight the FHS courses and clubs most aligned to those careers.

www.naviance.com

Naviance is a college and career readiness platform that helps connect academic achievement to post-secondary goals. It also allows students to create a plan for their futures by helping them discover their individual strengths and learning styles and explore college and career options based on their results.

Student can set up their own Career Cruising and Naviance accounts. Please see your counselor or career advisor for more information.

RECOMMENDED PROGRAM FOR COLLEGE AND CAREER SUCCESS

COURSE LEVELS

AP - Advanced Placement – Advanced Placement courses are designed with a specific focus on a college level approach to content, culminating in the Advanced Placement exam. AP courses specifically challenge high school students to become college students; mastery of curriculum and development of critical thinking skills enable learners to become truly articulate in a specific subject and to successfully take the Advanced Placement exam and, ultimately receive college credit.

DE- Dual Enrollment –allows high school students an opportunity to enroll in postsecondary courses and receive both high school and postsecondary credit.

H - Honors – Honor level courses are designed to enrich the student by offering an enhanced curriculum in each subject area, with particular attention to developing higher order thinking skills and sophisticated understanding of course material. They invite not only knowledge, but also insight and expertise for students accepting the challenge of the Honors curriculum.

R - Regents – core high school subjects required for a Regents Diploma to graduate.

**Course offerings may be subject to change based on the discretion of Freeport Public Schools. It may not be possible to offer all of the courses listed if student enrollment is too low to run a course or due to financial considerations.*

EARN COLLEGE CREDIT

*While Attending
Freeport High School*

Freeport High School and SUNY Farmingdale State College **Dual Enrollment Program**

Dual Enrollment is offered to students through a partnership between Freeport High School and SUNY Farmingdale. This program gives students the opportunity to gain college credit while attending Freeport High School. The students must maintain an average of 80 percent to receive college credit. Teachers have been vetted by SUNY Farmingdale to teach the course.

DUAL ENROLLMENT COURSE OFFERINGS

Global 9 Regents	History Through Graphic Novels
Global 9 Honors	Gender Relations
World History 9 Honors	Sociology
Global 10 Regents	Photo 1
Global 10 Honors	Accounting 1
AP World History	Pre-Calculus Honors
AP U.S. History	Virtual Enterprise
Participation in Government	Business Law
Participation in Government Honors	Animation
AP Government	Auto Mechanics 1
History Through Film	Auto Mechanics 2
Genocide

FREEPORT HIGH SCHOOL ADVANCEMENT PLACEMENT COURSES

*The Opportunities to Achieve
Are **ENDLESS!***

Advanced Placement (AP)
classes are challenging, college-level classes that students can take at Freeport High School. Students take AP Exams at the end of the course in May, measuring their mastery of college-level work. A score of 3 or higher on an AP Exam can typically earn students college credit and/or placement into advanced courses in college. We encourage you to challenge yourself and ask your guidance counselor about enrolling in AP courses.

AP CAPSTONE

The AP Capstone program gives you the chance to develop college-level academic skills and study subjects you love. It also gives you the chance to distinguish yourself to colleges.

This program recognizes high school students who have demonstrated outstanding college-level achievement in AP Seminar, AP Research, and additional AP courses through two awards:

AP Capstone Diploma: granted to students who earn scores of 3 or higher in AP Seminar and AP Research and on four additional AP exams of their choosing.

AP Seminar and Research Certificate: granted to students who earn scores of 3 or higher in both AP Seminar and AP Research.

AP SCHOLARS AWARDS

The AP Program recognizes high school students who have demonstrated outstanding college-level achievement through their performance on AP exams. Students can qualify for the following recognition:

SCHOLARS: granted to students who receive grades of 3 or higher on three or more AP exams.

SCHOLAR WITH HONOR: granted to students who receive an average grade of at least 3.25 on all AP exams taken and grades of 3 or higher on four or more of these exams.

SCHOLAR WITH DISTINCTION: granted to students who receive an average grade of at least 3.5 on all AP exams taken and grades of 3 or higher on five or more of these exams.

NATIONAL AP SCHOLAR: granted to students in the United States who receive an average of at least 4 on all AP exams taken and scores of 4 or higher on eight or more of these exams.

THERE ARE MANY BENEFITS OF TAKING AP COURSES...

- Students learn rigorous college-level content and skills.
- Taking AP courses is valued in the college admission process.
- Opportunity to earn valuable credit and placement in college.
- 85% of selective colleges and universities report that a student's AP experience favorably impacts admission decisions.
- AP courses tell college admission officials that students are challenging themselves and preparing for the rigors they'll encounter in their college careers.
- Taking an AP course helps students build critical thinking skills, confidence and the essential time management and study skills needed for college success.

The Pathway to Success

Earn a Degree

Upon graduation from P-TECH (up to six years of study) students will have earned a high school Regents diploma and a college Associate in Applied Science Degree in Mechanical Engineering Technology. They will have the opportunity to advance their education in a four-year degree program at Farmingdale State College.

Start a Career

P-TECH partners with industry leaders, giving students the experience they need to secure lucrative, high-level careers in manufacturing and engineering. P-TECH's comprehensive work-based learning program includes visits from industry experts, internships, shadow days, coaching and mentoring, and part-time employment.

No Cost for Students

P-TECH is funded through a New York State grant program and is delivered at no cost to students or their families. This means that P-TECH students will be enrolled in a two-year college degree program and an industry-based career development program free of charge.

Comprehensive Curriculum

P-TECH students will complete a full course sequence in the STEM disciplines (science, technology, engineering and math), manufacturing and engineering. The curriculum is aligned with the New York State Common Core Learning Standards, Regents Exams and Farmingdale State College A.A.S. Degree.

Expert Faculty

Classes are taught by New York State-certified high school teachers trained as college adjunct instructors.

Industry Partners

As P-TECH's anchor corporate partner, Arkwin Industries will lead a diverse group of manufacturing and engineering companies in delivering an extensive work-based learning experience. A full list of P-TECH industry partners to date are:

Arkwin Industries

**Aerospace and Defense
Diversification Alliance in
Peacetime Transition**

**The Association for Operations
Management**

**Long Island Forum for
Technology**

Long Island STEM Hub

The P-TECH Candidate

The program is open to incoming ninth graders who are eager to acquire the skills necessary to earn a college degree and to compete in a highly competitive work force. Applicants must be willing to commit to a rigorous course of study in science, math, career development and essential 21st century skills, such as problem solving and critical thinking.

Apply Now

While there is no test required to enroll in P-TECH, only 20 spaces per district are available for the year, so students are encouraged to apply as early as possible. Interested eighth grade students and their families should speak to their guidance counselors to apply.

According to Long Island Business News

"Everybody thinks manufacturing's dead. It still employs 80,000 people and has over 3,500 companies on Long Island. It's a major economic driver." —Claude Solnik
